

What is claimed is:

1. A portable telephone set having a holding member, which is attached to said portable telephone set body to hold said body by hooking it up on a user's belt, wherein said holding member is attached movably and stored in a storage portion of said portable telephone set body when said holding member is not used.

2. The portable telephone set according to claim 1, wherein, in the state that said holding member is stored in said storage portion, a front face of said holding member constitutes the same level as that of the front face of said telephone set body and said holding member comprises a portion of an outer shape of said telephone set body.

3. The portable telephone set according to claim 1, wherein an engagement mechanism is disposed to hold and engage said holding member at the storage position and at the available position, respectively.
